WHAT IS TRADING?

An Introduction to Trading

Trading involves buying and selling financial assets like stocks, forex, commodities, and futures to make a profit.

KEY MARKETS

- Stock Market.
- Futures Market.
- Forex Market.

BENEFITS OF TRADING

- Flexibility.
- Financial Independence.
- Skill development

STRUCTURE OF TRADING ACROSS MULTIPLE MARKETS

Understanding Trading Markets

STOCK MARKET

Long-term investments and short-term trades.

FOREX MARKET

Largest global financial market for currency trading

FUTURES MARKET

Contracts based on future prices of assets

FUTURES AND FOREX MARKETS – A GLOBAL PERSPECTIVE

World Structure of Futures and Forex Markets

FUTURE

- Futures contracts are agreements to buy or sell an asset at a predetermined price at a specified time in the future. They are commonly used for commodities like oil, gold, and agricultural products.
- Major exchanges include CME and NYMEX, which facilitate global trading of these contracts.
- Example: A gold futures contract allows a trader to hedge against fluctuations in gold prices, ensuring stability for both buyers and sellers.

FOREX

- Daily Trading Volume: \$7.5 trillion+, making it the largest and most liquid financial market globally.
- Global Accessibility: Operates 24/5, allowing participants from various time zones to trade continuously.
- Key Participants: Banks, institutions, hedge funds, and retail traders actively engage in currency trading, shaping the market dynamics.
- Economic Influence Example: Suppose a multinational corporation in Europe needs to purchase raw materials from the United States. It must convert its Euro earnings to US Dollars through the Forex market, demonstrating its vital role in global trade facilitation.
- Impact of Forex Movements: Changes in currency exchange rates can significantly affect imports, exports, and even international investments, emphasizing the need to understand Forex trends.

COURSE TIMELINE AND STRUCTURE

Learn to Trade with Us

Course Overview

Comprehensive Trading Course: A 10-week program designed to provide in-depth knowledge and practical skills in trading, covering everything from the basics to advanced strategies.

Bias and Disclaimer

- Students will participate in hands-on simulated trading sessions, guided by experienced mentors to apply theoretical knowledge.

- **Week 9-10:** Strategy Building and Review - Develop personalized trading strategies and receive feedback from mentors to ensure readiness for live trading.

WHAT IS A PROP FIRM ?

Prop Firm

- Definition: Proprietary trading firms provide traders with capital to trade in various financial markets. Traders use the firm's funds instead of their own.
- Structure: Traders are evaluated based on their performance during a simulated or real trading evaluation phase. Successful traders receive funding and share a portion of their profits with the firm.
- Example: A trader passing a prop firm's evaluation program could gain access to \$50,000 in trading capital, with a profit split of 80% to the trader and 20% to the firm.
- Safety for Clients: Clients only need to invest towards the purchase of evaluation accounts on the prop firm's platform. This minimizes their financial risk compared to traditional trading, as they are not directly risking large sums of personal capital in the markets.

Brokerage Firm

- Definition: Brokerages act as intermediaries, providing traders access to financial markets for buying and selling assets.
- Services Offered: They offer platforms, market data, and tools to facilitate trades, and may charge commissions or spreads for their services.
- Examples: Forex brokers provide access to the currency market, while futures brokers specialize in commodities like oil, gold, and agricultural products.
- Risk to Clients: Clients need to invest their own capital for trading and bear the risk of potential losses, which can vary based on market conditions and trading strategies used. Effective risk management is essential to minimize these potential losses.
